

# RWIS Release Notes - Release 2.1.2

April 24, 2019

## Summary of Changes

Release 2.1.2 is a patch release deploying one bug fix, correcting an issue with site metadata, fixing two data acquisition issues, and making minor updates to site content. The bug fix prevents users from making multiple selections of a single site on the map page. The data acquisition fixes addressed issues with RWIS data feeds for Mid-Pacific Region, Lower Colorado Region, and Upper Colorado Region. Website content changes include adding the monthly updates that have been distributed since Release 2.1.1, updating the release notes, and adding new announcements to the RWIS home page. See details in the table below and contact the team at [rwis@usbr.gov](mailto:rwis@usbr.gov) with any questions.

## Issues Addressed in this Release

Issue #	Title	Description
129	Fix Metadata for Hungry Horse and Como	Updated metadata for Hungry Horse Res Nr Hungry Horse; MT and Lake Como Reservoir sites to correct region from GP to PN
